

Fancy Face

Rashes/Cold Sores

Unfortunately we are unable to paint any person who appears to have a cold sore, rash or any other apparent skin complaint as some conditions may be transferred or aggravated by painting/sponging.

Allergies/Sensitive Skin

We use "Snazaroo" face painting products. Although our paints are tested to ensure minimal risk of allergic reactions, if you have very sensitive skin it may be advisable not to have your face painted. In some cases we will paint arms or hands.

Young Children

We prefer to paint children over the age of 3 or at least those who are *able* to sit still! There is no upper age limit !!
